FOR LIBRARIANS

Empowering Libraries with the Latest Research

Karger 

Karger is an international publisher of scientific and medical content, dedicated to serving the information needs of the scientific community, clinicians, and patients.

Since 1890 we have evolved continuously, keeping pace with the latest shifts and developments in research and publishing. New opportunities in the publishing and healthcare sectors have allowed us to focus more closely than ever on the needs and objectives of our clients in the field of Health Sciences, entering new fields of business and intensifying our use of digital technologies. This ambition is reflected in our new logo, which stands for the spark that kindles every new project, job, and publication.

Publish & Access

Road to Open

Open Access – and Open Science – have become a major focus of Karger Publishers and our mission to "connect and advance Health Sciences." Our promise to fully embrace "open for Open" and a sustainable transition to Open Access takes multiple forms, including: collaborating on innovative Transformative Agreements; offering flexible Open Access publication services; trialing the Subscribe to Open model; developing Partner

Publications that give research-related organizations an effective, tailored way to connect with the global scholarly community; and flipping (converting) quality subscription journals to Open Access to provide an ever higher share of openly accessible content. Working in tandem with all the communities we serve, we are well on the road to open.

Transformative Agreements

Karger Publishers helps enable the sustainable transition from an access-based to a publishing-based model by offering agreements covering both, according to the individual needs of institutions. Transformative Agreements can be combined with other services along the entire cycle of knowledge in Health Sciences. For more information visit:

karger.com/pages/transformative-agreements

Open Access Vouchers

Open Access options are also available apart from a wide-ranging Transformative Agreement. Karger Publishers helps institutions enable their researchers to benefit from more visibility and impact with Open Access publishing vouchers.

Partner Publications

Partner Publications are platinum Open Access journals published in partnership with global academic research institutions, societies, government bodies, research funders, and other health research organizations. Partner Publications are an integral part of the Karger journal portfolio, following the same quality and ethical standards as all Karger journals. For more information visit:

karger.com/pages/partner-publications

Open Access Journals

Recognizing the need for more trusted, peer-reviewed Open Access publishing outlets, Karger Publisher has "flipped" numerous journals from the subscription model to Open Access, and now publishes a total of 30+ fully Open Access journals.

In addition, two journals are piloting the Subscribe-to-Open model, which has enabled their entire contents to be published Open Access in 2023 at no cost to authors. If subscriptions remain at the required level, the journals will be Open Access again in 2024.

Curate

Digital Content Curation

Select from all Karger content and combine – include – fuse the relevant and focused material!

Based on your fields of interest and specialization, we are happy to provide tailored collections and packages, including content from the complete Karger portfolio and suite of solutions! Pick-and-choose options include:

Customized eJournal Collections

Selected titles from our broad journal program covering all disciplines of human medicine in clinical basic and research areas.

Subject Packages

Comprising eJournals and eBooks focused on a single or various research or medical subjects. The Subject Packages provide highly selected content to meet the increasing demand for specific information of researchers, specialists, and practitioners.

Topic Article Packages

Keyword- and subject-based content from preselected journal articles and book chapters from across the entire range of the Karger publishing program, covering individual fields of interest. The semantic search-based selection includes only highly relevant search results and guarantees a maximum level of customization.

Services

Achieve Publication Success with Karger

From the first steps of research to publication with an impact – Karger Publishers supports institutions and their researchers with actionable guidance and know-how for every step along the cycle of knowledge. Depending on researchers' needs, institutions may choose from any combination of self-study online courses, live webinars, and workshops.

Early career researchers learn and gain confidence in their skills, while more experienced researchers also benefit from getting their questions answered and gaining new insights. Karger's Education Services can be combined with other Karger products or services.

Education

Drafting and publishing a research paper can be a complicated process. Karger has created Campus – 10 e-learning courses to guide authors through the key challenges they face in successful publication of their research.

Key Features

- Essential – covers key aspects on publishing research
- Focused – 10 courses. Practical, relevant and comprehensive
- Interactive – keeps students engaged and interested
- Trusted – created and delivered by Karger Publishers – over 130 years' experience
- Multilingual – delivered in 6 languages

Benefits

- Develop the writing and publishing skills of your researchers
- Maximize the opportunity to publish research in high-impact journals from the start of a researcher's career
- Provide trusted resources that support ethically sound research
- Monthly updates on the course progress of your researchers

Have a look at all available courses:

karger.com/campus

Language Editing

English is the primary language for scientific publishing, so a well-written manuscript in English is key to acceptance in respected international journals and achieving visibility. For non-native speakers of English, publishing in a foreign language can be a struggle – but it doesn't have to be.

Our Language Editing Packages, in cooperation with Enago, provide

- Substantive editing
- Copy editing
- Translation services in 12 languages

Services are available through a co-branded web portal.

The Science of Hearing and Balance

Audiology and Neurotology provides a forum for the publication of the most advanced and rigorous scientific research related to the basic science and clinical aspects of the auditory and vestibular system and diseases of the ear. This journal seeks submission of cutting-edge research opening up new and innovative fields of study that may improve our understanding and treatment of patients with disorders of the auditory and vestibular systems, their central connections, and their perception in the central nervous system.

Published since 1949, *Folia Phoniatrica et Logopaedica* provides a forum for international research on the anatomy, physiology, and pathology of structures of speech, language, swallowing, and hearing mechanisms. Original papers published in this journal report new findings on basic function, assessment, management, and test development in communication sciences and disorders, as well as experiments designed to test specific theories of speech, language, swallowing, and hearing function.

ORL

An international forum for researchers and clinicians in otorhinolaryngology and head and neck surgery

FACTS & FIGURES

ISSN 0301-1569
e-ISSN 1423-0275

More information:
karger.com/orl

ORL contains concise, original scientific papers of interest for both clinicians and researchers in otorhinolaryngology and head and neck surgery. Contributions drawn from the basic sciences cover new knowledge on the anatomy, pathology, pathophysiology, immunology, and tumor biology of the head and neck and the auditory and vestibular system, the salivary glands, paranasal sinuses, and of the organs of the upper respiratory and digestive tract. The practical value of the journal is accentuated by reports of clinical progress in diagnosis and therapy. *ORL* also hosts The Smell and Taste Corner, a section dedicated to the field of chemosensory issues: olfaction, taste, and intranasal and oral perception.

Advances in Oto-Rhino-Laryngology

Material for each volume in this series has been skillfully selected to document the most active areas of otorhinolaryngology and related specialties, such as neurotology and oncology. The series reproduces results from basic research and clinical studies pertaining to the pathophysiology, diagnosis, clinical symptoms, course, prognosis, and therapy of a variety of ear, nose, and throat disorders. The numerous papers correlating basic research findings and clinical applications are of immense value to all specialists engaged in the ongoing efforts to improve management of these disorders. Acting as a voice for its field, the series has also been instrumental in developing subspecialties into established specialties.

A Transformative Journal by Karger

Established in 1937, *Cardiology* provides a forum for scientific progress in the prevention, recognition, and treatment of heart disease. Bridging clinical, preclinical, and translational research, the contents include original research articles, topical reviews, and expert opinion commentaries. Sections such as "Coronary Artery Disease," "Imaging," "Electrophysiology and Arrhythmia," or "eCardiology/Digital Health" highlight the wide variety of subspecialty areas covered and feature new developments in noninvasive and invasive diagnostic methods, epidemiology, as well as pharmacological, preventive, and mechanical/surgical therapies. *Cardiology* publishes articles relevant to cardiologists, cardiac surgeons, internists, clinical physiologists, pharmacologists, and professionals from other areas of medicine interested in cardiovascular diseases. Note that submissions describing basic research should have a translational focus.

A Transformative Journal by Karger

Founded in 1964, the *Journal of Vascular Research (JVR)* provides a platform of rigorous, cutting-edge research in vascular and microvascular biology, physiology, and pathophysiology for basic science and translational researchers. Clinicians with impactful clinical trials and observations regarding the vasculature are also welcome. The scope of the journal covers a broad spectrum of vascular and lymphatic research, including structure, function, hemodynamics, mechanics, cell signaling, intercellular communication, development, growth, and differentiation. Methodological advances in any of these areas are additionally covered by *JVR*. *JVR* is the official journal of the European Society of Microcirculation. A biennial prize is awarded to the authors of the best paper published in the journal over the previous 2 years.

Bringing together basic, translational, and clinical research across a range of disciplines, *Pulse* provides a forum for communicating the latest findings and hypotheses that enhance our understanding of the entire spectrum of vascular research. This includes arterial stiffness and pulsatile hemodynamics in health and disease, vascular health, risk, and disease, as well as the use of precision medicine for novel diagnosis, therapy and prevention, and the interconnection with the cardiovascular system. The transdisciplinary approach of the journal fosters collaboration in relevant areas including cardiology, nephrology, neurology, endocrinology, diabetology, gerontology, and general medicine.

The journal welcomes submissions from all areas of vascular research, including but not limited to epidemiology, pathophysiology, diagnostics, therapeutics, and prevention.

e-ISSN 1421-976X

More information:
karger.com/cre

Caries Research publishes epidemiological, clinical, and laboratory studies in dental caries, fluorosis, erosion, and related dental diseases. Some studies build on the considerable advances already made in caries prevention, for example through fluoride application. Some aim to improve understanding of the increasingly important problem of dental erosion and the associated tooth wear process. Others monitor the changing pattern of caries in different populations, explore improved methods of diagnosis, or evaluate methods of prevention or treatment. Studies using genetic methods to identify human genes or mutations associated with caries prevalence are welcome, as are manuscripts using modern high-throughput sequencing methods to characterize microbial biofilms associated with oral health and active caries. The broad coverage of innovative research into dental caries is unique and has given the journal an outstanding international reputation as an indispensable source for both basic scientists and clinicians engaged in understanding, investigating, and preventing dental diseases.

Monographs in Oral Science

For over three decades, *Monographs in Oral Science* has provided a source of in-depth discussion of selected topics in the sciences related to stomatology. Senior investigators are invited to present expanded contributions in their fields of special expertise.

The topics chosen are those which have generated a long-standing interest, and on which new conceptual insights or innovative biotechnology are making considerable impact. Authors are selected on the basis of having made lasting contributions to their chosen field and their willingness to share their findings with others.

Case Reports in Dermatology is a peer-reviewed, Open Access journal that publishes original case studies covering the entire spectrum of dermatology, including prevention, diagnosis, treatment, toxicities of therapy, supportive care, quality-of-life, and survivorship issues. The journal will also accept case reports related to the use of novel technologies, both in the area of diagnosis and treatment. Supplementary material is welcomed and free of charge. In this forum, clinicians and researchers communicate their observations to the broadest possible audience in the community.

Published since 1893, *Dermatology* provides a worldwide survey of clinical and investigative dermatology. Original papers report clinical and laboratory findings. In order to inform readers of the implications of recent research, reviews prepared by invited, internationally recognized scientists are regularly featured. In addition, the journal publishes papers on novel treatments, surgical pearls, consensus guidelines, and industry news. *Dermatology* offers the analytical dermatologist a broad range of information, from practical problem solving to a deeper mechanistic understanding of skin diseases, while at the same time providing space for further hypotheses that may help to find new solutions to old problems. The journal publishes contributions from across the globe on a wide range of skin-related topics including epidemiology, skin biology, clinical dermatology, and therapy. It enjoys an eminent reputation in the field of dermatology.

Skin Appendage Disorders

The first journal exclusively dedicated to research and treatment of hair, nail, and skin gland diseases

Official Organ of

Affiliated with

- American Hair Research Society

A Transformative Journal by Karger

Skin Appendage Disorders provides a wide range of original and review articles dealing with all aspects of hair, nail, and skin glands. The section "Novel Insights from Clinical Practice" introduces special case examples and their treatments.

Innovative therapies are presented under the heading "Novel Treatments," and in "Clinical Investigations" the latest findings are discussed. A special highlight are the articles in the section "Guidelines" that present consensus treatments, which are a must-read for anyone who wants to stay up to date.

The section "Adnexal Surgery" focuses on both established and approved as well as new surgical treatments. Pathological evaluation of skin appendage disorders requires specific training, and the "Pathology" section will be open to original papers and reviews on this topic.

Covering all aspects of the field, *Skin Appendage Disorders* is of primary importance for dermatologists in clinics and research, dermatological surgeons, as well as cosmetic dermatologists.

Skin Pharmacology and Physiology

Topical therapies are the main interest of this journal that seeks submissions of original papers and systematic reviews in pharmacological aspects of the skin and skin physiology. Modulation of the epidermis (e.g., epidermal barrier function), exogenous influences on skin functions, studies of skin physiology (if performed with non-invasive instruments), and the study of the regulatory pathways involved in skin penetration of topical formulations through in vivo and in vitro models are invited.

Studies with well-characterized active ingredients performed on animals will not be accepted but may be eligible if specific pathways or modes of action with little or no published data are studied.

Systemic treatment studies on epidermal functions and innovative approaches to methodology, skin pharmacology or clinically relevant problems, and cosmetic studies with relevant effects on skin physiology and an appropriate control (i.e., placebo, not compared to baseline) may be submitted.

Aesthetic Dermatology

In the book series *Aesthetic Dermatology*, innovations in techniques, such as laser therapy, as well as pharmacologic and cosmetic procedures are presented. Each volume is edited by one or several authorities in their respective field who invite contributors from all over the world to share their versatile experience. Thoroughly researched, evidence-based findings are discussed along with innovations in therapy. The series represents an update on key areas of aesthetic dermatology that will interest both plastic surgeons and aesthetic dermatologists.

Current Problems in Dermatology

This series presents a selection of new ideas and information in the field of clinical and investigative dermatology. Crossing the borders of skin diseases, it explores interdisciplinary strategies, linking dermatology with immunology, allergology, and other research areas. Each volume is individually designed to provide an up-to-date presentation of new and interesting topics in dermatology and skin research. The contributing authors are acknowledged experts in their fields. The wide range of topics discussed includes normal and pathological skin conditions, the development of new equipment, drugs, and analytical techniques, and recent advances in the treatments that can be offered to patients.

A Partner Publication by Karger

The *Dubai Diabetes and Endocrinology Journal* welcomes original contributions on all aspects of diabetes, endocrinology, and metabolism. Taking into account that diabetes has become a pandemic, the journal provides a platform for worldwide communication and scientific exchange to researchers and clinicians dealing with diabetes. The focus of the journal lies on the publication of papers on morphological, biochemical, physiological, pathophysiological, and clinical aspects of research on diabetes and metabolism. In addition to research articles, further types of papers such as review articles, case reports, reviews, meta-analyses, letters, editorials, and commentaries make the journal a comprehensive and interesting read. The researcher and practitioner who seeks to stay up to date on the developments in the fields of diabetes and metabolism will find a wealth of information in the *Dubai Diabetes and Endocrinology Journal*.

The mission of *Hormone Research in Paediatrics* is to improve the care of children with endocrine disorders by promoting basic and clinical knowledge. The journal facilitates the dissemination of information through original papers, clinical guidelines or novel insights from clinical practice, and abstracts from international congresses in pediatric endocrinology. Periodic editorials from outstanding pediatric endocrinologists also address contemporary research by critically reviewing the major strengths and weaknesses of the studies. *Hormone Research in Paediatrics* is the official journal of the European Society for Paediatric Endocrinology, Pediatric Endocrine Society, and Sociedade Latino-Americana de Endocrinologia Pediátrica.

More information:

karger.com/nen

Neuroendocrinology publishes original research covering all aspects from basic to clinical neuroendocrinology. The journal explores the complex bidirectional interactions between the nervous systems and the endocrine systems in both physiological and pathological conditions.

The journal reports on the latest contributions elucidating roles of the peptidic and steroidal hormones and other substances in the control of reproduction, development, sex/gender, degeneration, energy balance, stress responses, inflammation, rhythms, cognition, behavior, tumors, and aging. In addition to basic or clinical research, published articles appeal to cutting-edge omics approaches and imaging methods to address the molecular functioning and neuroanatomy of neuroendocrine systems in this rapidly expanding field.

Neuroendocrinology seeks scientific excellence. The journal regularly publishes special/focus issues of topical interest and contemporary review articles by renowned experts to address hot topics in current research.

Endocrine Development

This series is devoted to specific areas of fetal, neonatal, pediatric, and adolescent endocrinology. It addresses a wide range of relevant issues in the context of a well-defined subject and covers new areas of clinical and basic research. Clear evidence-based guidelines on clinical management by highly qualified basic and clinical scientists who present their clinically relevant recent findings are also provided. Bringing together experts from related disciplines, such as fetal and perinatal medicine, epidemiology, public health, and molecular endocrinology, the volumes cover a broad spectrum in endocrine development.

Frontiers of Hormone Research

New technologies and methodologies in diagnostics and therapeutics have led to significant improvements in identifying and characterizing an increasing number of conditions in all aspects of endocrine and metabolic dysfunctions. Novel insights into endocrine physiology and pathophysiology allow for new perspectives in clinical management, leading to the development of molecular, personalized treatments. The active interplay between basic and clinical research has become fundamental to provide patients with the most appropriate care and to advance future research. This series explores cutting-edge topics in the field of endocrinology and metabolism, providing updated information from international leading researchers and clinicians. From in vitro studies to daily clinical applications, each volume presents a state-of-the-art overview including a future perspective.

Case Reports in Gastroenterology is a peer-reviewed, open-access journal that publishes original case reports covering the entire spectrum of gastroenterology. The journal will also accept case reports related to the use of novel technologies, both in the area of diagnosis and treatment. Supplementary material is welcome and free of charge. The reports are organized according to the classification used by the American Gastroenterological Association Institute; it will be possible to search across the entire growing collection of case reports with universally used terms, further facilitating the retrieval of specific information. In this forum, clinicians and researchers communicate their observations to the broadest possible audience in the community.

Digestion concentrates on clinical research reports: in addition to editorials and reviews, the journal features sections on stomach/esophagus, bowel, neurogastroenterology, liver/bile, pancreas, metabolism/nutrition, and gastrointestinal oncology. Papers cover physiology in humans, metabolic studies, and clinical work on the etiology, diagnosis, and therapy of human diseases. It is thus especially cut out for gastroenterologists employed in hospitals and outpatient units. Moreover, the journal's coverage of studies on the metabolism and effects of therapeutic drugs carries considerable value for clinicians and investigators beyond the immediate field of gastroenterology.

Digestive Surgery presents a comprehensive overview in the field of gastrointestinal surgery. Interdisciplinary in scope, the journal keeps the specialist aware of advances in all fields that contribute to improvements in the diagnosis and treatment of gastrointestinal disease. Particular emphasis is given to articles that evaluate not only recent clinical developments, especially clinical trials and technical innovations such as new endoscopic and laparoscopic procedures, but also relevant translational research. Each contribution is carefully aligned with the need of the digestive surgeon. Thus, the journal is an important component of the continuing medical education of surgeons who want their practice to benefit from a familiarity with new knowledge in all its dimensions.

Imparting the most current information to physicians caring for patients with intestinal diseases, this journal seeks to identify the basic pathophysiological mechanisms common to different inflammatory intestinal diseases, to compare the environmental conditions involved in their pathogenesis, and to provide important insights into their therapies. *Inflammatory Intestinal Diseases* thus reduces the gap between clinical and basic sciences as well as between hepatology and inflammatory diseases of the intestinal tract, such as inflammatory bowel diseases, celiac disease, and irritable bowel syndrome. *Inflammatory Intestinal Diseases* also aims to improve the exchange of knowledge between researchers from Eastern and Western countries, which is reflected in the composition of the editorial board. The journal accepts randomized controlled clinical trials, observational studies, and cost-effectiveness analyses as well as commentary type and systematic reviews and consensus statements.

Liver cancer has a very high prevalence among cancers in general and is one of the most common causes of death worldwide. Based on these facts, the journal *Liver Cancer* serves the growing need to better understand the causes, mechanisms, and therapy of the malignancy. It provides the international community of researchers and clinicians with a platform for their research results, focusing on molecular carcinogenesis, prevention, surveillance, diagnosis, and treatment, including molecular targeted therapy, of the disease. *Liver Cancer* publishes clinical and translational research related to the field of liver cancer in both humans and experimental models in the form of original and review articles.

This interdisciplinary journal is unique in its field as it covers the principles of both gastrointestinal medicine and surgery required for treating abdominal diseases. In each issue invited reviews provide a comprehensive overview of one selected topic. Thus, a sound background of the state-of-the-art in clinical practice and research is provided. A panel of specialists in gastroenterology, surgery, radiology, and pathology discusses different approaches to diagnosis and treatment of the topic covered in the respective issue. Original articles, case reports, and commentaries make for further interesting reading. The journal is a valuable source of information, imparting essential knowledge for mastering the major interdisciplinary challenges in gastrointestinal medicine and surgery.

Frontiers of Gastrointestinal Research

This series is designed for both the physician active in the clinical practice of gastroenterology and the gastroenterologist or student engaged in research. Each volume offers a ready reference guide to current progress and a review of past achievement in a particular area of gastrointestinal study. The series covers pathological, pharmacological, diagnostic, and therapeutic considerations relating to the digestive system, as well as the latest techniques and instrumentation used in the management of gastrointestinal disorders.

Biomedicine Hub is an interdisciplinary Open Access journal: a “hub” for researchers, clinicians, and public health professionals across biomedical disciplines to share research findings, ideas, theories, experimental results, and clinical experience. *Biomedicine Hub* facilitates the exchange of knowledge between disciplines, with a focus on translational science and emerging interdisciplinary topics. It encourages international collaborations and supports early-career researchers. By accepting Registered Reports in addition to classic article types, early feedback on research work is also guaranteed.

Biomedicine Hub publishes all relevant articles of sound ethical and scientific quality regardless of their novelty or expected impact. Contributions from a wide range of biomedical fields are welcome.

Dubai Medical Journal

Edited in Dubai with an international perspective

FACTS & FIGURES

Editor-in-Chief: **Wadeia Sharief** (Dubai)

Category: Clinical and Basic Research

Field of interest: General Medicine

2024: Volume 7, 4 issues per volume

Language: English

Founded: 2018

ImpactFactor: 1.4 (2022)

Listed in bibliographic services, including: DOAJ, Embase, Emerging Sources Citation Index

e-ISSN 2571-726X

More information:

A Partner Publication by Karger

The mission of the *Dubai Medical Journal* is to encourage innovative research by promoting original scientific research in the fields of medicine, health sciences, nursing, pharmaceuticals, and laboratory work in addition to women's and children's health. Nonclinical subjects related to medicine, especially ethics and complementary medicine as well as social and cultural observations, are also covered. As international as Dubai itself, the journal offers a global perspective, but also focuses on the United Arab Emirates. Partnerships with local and international medical and health authorities are envisaged. The journal facilitates the dissemination of information through research articles, review articles, case reports, editorials, letters, book reviews, meta-analyses, and commentaries. An educational corner helps to ensure continuous professional development and education. Besides this, the journal also offers a platform for controversies, mythology, and much more.

Medical Principles and Practice

An international journal for medical and biomedical sciences

FACTS & FIGURES

Editor-in-Chief: **Raj Raghupathy** (Kuwait)

A Partner Publication by Karger

Medical Principles and Practice is an international, peer-reviewed, openaccess journal that covers all areas of biomedical research. *Medical Principles and Practice* welcomes high-quality science that seeks to elucidate the molecular and cellular basis of normal and pathological biological processes and contributes substantially to the advancement of knowledge. The focus of *Medical Principles and Practice* is on original research, reviews, and systematic reviews that provide novel and important mechanistic insights. Papers accepted for publication in *Medical Principles and Practice* can therefore fall under the umbrellas of not only medicine, but also biochemistry, biophysics, genetics and epigenetics, immunology, microbiology, molecular biology, pathology, pharmacology, physiology, and systems biology, etc. Descriptive studies stating only facts and observations without mechanistic evidence and insights, studies covering perceptions or attitudes, studies based on unverified questionnaires, and works of purely local interest are discouraged. Publication in this journal is free for authors.

A Transformative Journal by Karger

During the last few decades, *Cytogenetic and Genome Research* has been the leading forum for original reports and reviews in human, animal, insect, and plant cytogenetics, including clinical, molecular, and comparative cytogenetics. With the advance of microarray and high-throughput sequencing technologies, many of its papers have centered on genome research, including chromosome structure and function, genome evolution, human disease pathogenesis, cancer genomics, gene regulation and expression, epigenetics, and related areas. Also featured are recent international reports on human and animal chromosome nomenclature. In addition to regular issues, the journal publishes topical issues on a broad variety of themes.

Human Heredity

Methodological and applied genetic research –
from populations to disease mechanisms

Gathering original research reports and short communications from all over the world, *Human Heredity* is devoted to methodological and applied research on the genetics of human populations, association and linkage analysis, genetic mechanisms of disease and new methods for statistical genetics, for example analysis of rare variants and results from next-generation sequencing. The value of this information to many branches of medicine is shown by the number of citations the journal receives in fields ranging from immunology and hematology to epidemiology and public health planning. Special issues on methodological topics (such as "Consanguinity and Genomics" in 2014; "Integration of Omics Data in Genetic Epidemiology" in 2015) or reviews of advances in particular fields ("Genetic Diversity in European Populations: Evolutionary Evidence and Medical Implications" in 2014; "Genes and the Environment in Obesity" in 2013) are published every year. Renowned experts in the field are invited to contribute to these special issues.

Molecular Syndromology aims to furnish the medical genetics community with clinically useful information regarding genetic and genomic disorders. The scope of *Molecular Syndromology* includes papers that elucidate the molecular and biochemical basis of the disease, genotype-phenotype correlations, and the prognosis and treatment options based on knowledge of the underlying mutation(s). To do so, *Molecular Syndromology* publishes research and review articles, case reports revealing novel genes, mutations and phenotypes, and summaries of symposia and workshops on themes with relevance to clinical genetics.

A Transformative Journal by Karger

Recent discoveries in experimental and clinical research have led to impressive advances in our knowledge of the genetic and environmental mechanisms governing sex determination and differentiation, their evolution as well as the mutations or endocrine and metabolic abnormalities that interfere with normal gonadal development. *Sexual Development* provides a unique forum for this rapidly expanding field. Its broad scope covers all aspects of genetics, molecular biology, embryology, endocrinology, evolution, and pathology of sex determination and differentiation in humans and animals. It publishes high-quality original research manuscripts, review articles, short reports, case reports, and commentaries. An internationally renowned and multidisciplinary editorial team of 3 chief editors, 10 prominent scientists serving as section editors, and a distinguished panel of editorial board members ensures fast and author-friendly editorial processing and peer reviewing.

Monographs in Human Genetics

Human genetics represents a highly diversified field covering an ever-increasing number of topics ranging from basic research to medical practice. The well-established book series *Monographs in Human Genetics* focuses on important hereditary diseases, their molecular basis, clinical impact, and eventual treatment. With its concise but highly informative reviews by experts from different fields, *Monographs in Human Genetics* provides essential reading not only for researchers but also for physicians and students interested in specific genetic diseases.

Understanding the mechanisms of aging and age-related diseases has become an urgent matter given the growing proportion of older adults in the population. *Gerontology*, the oldest journal in the field, is the only journal with contributions from multiple disciplines. Its papers support the fundamental goals of extending active life and enhancing its quality. In the Clinical Section, the etiology, pathogenesis, prevention, and treatment of age-related diseases are discussed from a gerontological rather than a geriatric viewpoint. The Experimental Section contains up-to-date contributions from basic gerontological research. Papers dealing with behavioral development and related topics are published in the Behavioral Science Section. Basic aspects of regeneration in different experimental biological systems as well as in the context of medical applications are dealt with in the Regenerative Section, whereas the Technological Section contains important information on major technological advances for older adults. Providing a primary source of high-quality papers covering all aspects of aging in humans and animals, *Gerontology* serves as an ideal forum and information source for all readers interested in a broad perspective on the topic of aging.

Interdisciplinary Topics in Gerontology and Geriatrics

At a time when interest in the process of aging is driving more and more research, *Interdisciplinary Topics in Gerontology and Geriatrics* offers investigators a way to stay at the forefront of developments. This series represents a comprehensive and integrated approach to the problems of aging and presents pertinent data from studies in animal and human gerontology. In order to provide a forum for a unified concept of gerontology, both the biological foundations and the clinical and socio-logical consequences of aging in humans are presented. Individual volumes are characterized by an analytical overall view of the aging process, novel ideas, and original approaches to healthy aging as well as age-related functional decline.

Acta Haematologica is a well-established and internationally recognized clinically oriented journal featuring balanced, wide-ranging coverage of current hematology research. A wealth of information on such problems as anemia, leukemia, lymphoma, multiple myeloma, hereditary disorders, blood coagulation, growth factors, hematopoiesis, and differentiation is contained in first-rate basic and clinical research papers – some of which are accompanied by editorial comments by eminent experts. These are supplemented by short state-of-the-art communications, reviews, and correspondence, as well as occasional special issues devoted to “hot topics” in hematology. Cutting-edge clinical information, along translational research relevant to clinical daily life, will keep the practicing hematologist well informed of the new developments in the field.

This journal is devoted to all areas of transfusion medicine. These include the quality and security of blood products, therapy with blood components and plasma derivatives, transfusion-related questions in transplantation, stem cell manipulation, therapeutic and diagnostic problems of hemostasis, immunohematological investigations, and legal aspects of the production of blood products as well as hemotherapy. Both comprehensive reviews and primary publications that detail the newest work in transfusion medicine and hemotherapy promote the international exchange of knowledge within these disciplines. Consistent with this goal, continuing clinical education is also specifically addressed.

The field of neuroimmunomodulation explores the way in which the nervous system interacts with the immune system via neural and hormonal actions and vice versa. Encompassing both basic and clinical research, *Neuroimmunomodulation* reports on all aspects of these interactions that bridge brain and immune system in bidirectional ways. The journal is also open to psychoneuroimmunology. Basic investigations consider all neural and humoral networks from molecular genetics through cell regulation to integrative systems of the body. Although primarily devoted to research articles, timely reviews on psycho-neuro-endocrine-immune interrelations are published on a regular basis.

Immune System features Open Access original research and reviews reporting on translational and clinical studies encompassing all the field of immunology, bridging clinical with preclinical, and translational investigations. The journal emphasizes evidence-based clinical and laboratory research with statistically valid results that clearly help advancing our knowledge in the field. It specifically welcomes Intra and inter disciplinary Environmental immunology, Immunomics, Immunotherapy and including but not restricted to immune aspects of allergy, disorders of the respiratory tract, skin and autoimmune and neurodegenerative disorders. It encompasses original randomized controlled trials, as well as real-world evidence studies, (systematic) reviews, but also well-elaborated clinical cases and case-series could be acceptable. The transfer of information from fundamental research to clinical research and clinical practice is particularly welcome. Contributions and ideas from large segments of the scientific community are welcome to make *Immune System* a viable, much needed, and up-and-coming forum for current basic and applied immunological research.

The *Journal of Innate Immunity* is a bimonthly Open Access journal covering research on innate immunity, including humoral, cellular, and clinical aspects. The journal includes original papers and reviews in basic and clinical research. Subject areas such as microbiology, immunology, and infectious diseases are also covered. It adheres to a very tight publication schedule: papers are published online within a few weeks of submission. In addition to regular articles, some issues feature a special section with a thematic focus.

Chemical Immunology and Allergy

Appearing for the first time in 1939, *Progress in Allergy* was the first and, for many years, the only international review series in the English language devoted to immunology. The present title, *Chemical Immunology and Allergy*, reflects the rapidly increasing role of concepts and techniques of molecular and cell biology, as well as the greater emphasis now being placed on research into the biologic problems of immunology, hypersensitivity, and immunopathology. Highly specialized, single-topic volumes keep both investigators and practicing physicians up to date with the latest developments in areas of immunology and allergy where recent research has been concentrated.

Practical information on hemodialysis, hemofiltration, peritoneal dialysis, and apheresis is featured in this journal. Recognizing the critical importance of equipment and procedures, particular emphasis has been placed on reports, drawn from a wide range of fields, describing technical advances and improvements in methodology. Papers reflect the search for cost-effective solutions which increase not only patient survival, but also patient comfort and disease improvement by prevention or correction of undesirable effects. Advances in vascular access and blood anticoagulation, problems associated with the exposure of blood to foreign surfaces, and acute-care nephrology, including continuous therapies, also receive attention. Nephrologists, internists, intensivists, and hospital staff involved in dialysis, apheresis, and immunoadsorption for acute and chronic solid organ failure will find this journal useful and informative. *Blood Purification* also serves as a platform for multidisciplinary experiences involving nephrologists, cardiologists, and critical care physicians in order to expand the level of interaction between different disciplines and specialties.

The journal *Cardiorenal Medicine* explores the mechanisms by which obesity and other metabolic abnormalities promote the pathogenesis and progression of heart and kidney disease (cardiorenal metabolic syndrome). It provides an interdisciplinary platform for the advancement of research and clinical practice, focusing on translational issues. Attention is paid to the fact that some metabolic abnormalities cluster with heart and chronic kidney disease, and collectively this is called the cardiorenal metabolic syndrome. Moreover, certain metabolic abnormalities of the heart promote impaired coronary artery endothelial function, diastolic dysfunction, and ischemic preconditioning that parallel glomerular hyperfiltration and impairments in proximal tubule handling of sodium and albumin. Another point of focus is the role of the obesity epidemic in promoting the increasing incidence of heart and kidney disease in industrialized countries and the prevailing problems of insufficient exercise and excessive consumption of cheap, unwholesome food in the promotion of the cardiorenal metabolic syndrome in both adults and children. *Cardiorenal Medicine* addresses a multidisciplinary audience consisting of nephrologists, cardiologists, nutritionists, endocrinologists, physiologists, and general internists.

Case Reports in Nephrology and Dialysis is a peer-reviewed, open-access journal that publishes original case reports covering the entire spectrum of nephrology and dialysis, including genetic susceptibility, clinical presentation, diagnosis, treatment or prevention, toxicities of therapy, critical care, supportive care, quality-of-life, and survival issues. The journal will also accept case reports dealing with the use of novel technologies, both in the area of diagnosis and treatment. In this forum, clinicians and researchers can communicate their findings to a broader neurology community. The authors may also provide supplementary material free of charge.

Glomerular Diseases is a first-in-class Open Access journal focusing exclusively on the glomerulus. Its overarching purpose is to disseminate cutting-edge clinical knowledge and expertise coupled with innovation in enhanced morphological capture, genomics, molecular signatures, epigenetics, machine learning, and statistical analytics in order to accomplish precision medicine for patients with glomerular diseases. It will serve the international community of academicians, clinicians, clinical trialists, patients, and patient-centered organizations. *Glomerular Diseases*, as a forum for frontline clinical, basic, and informatics science as well as clinical practice, ultimately aims to improve patient care. *Glomerular Diseases* welcomes review articles and original research in the fields of clinical nephrology, renal pathology, analytical biostatistics, bioinformatics methods and their applications, as well as in basic science, genetics, genomics, proteomics, and biomarker discovery. The journal includes a patient-focused corner and publishes editorial and opinion pieces.

Kidney and Blood Pressure Research

This journal comprises both clinical and basic studies at the interface of nephrology, hypertension, and cardiovascular research. The topics to be covered include the structural organization and biochemistry of the normal and diseased kidney, the molecular biology of transporters, the physiology and pathophysiology of glomerular filtration and tubular transport, endothelial and vascular smooth muscle cell function, and blood pressure control, as well as water, electrolyte, and mineral metabolism. Also discussed are the (patho)physiology and (patho)biochemistry of renal hormones, the molecular biology, genetics, and clinical course of renal disease and hypertension, the renal elimination, action, and clinical use of drugs, as well as dialysis and transplantation. Featuring peer-reviewed original papers, editorials translating basic science into patient-oriented research and disease, in-depth reviews, and regular special topic sections, *Kidney and Blood Pressure Research* is an important source of information for researchers in nephrology and cardiovascular medicine.

Kidney Diseases aims to provide a platform for the communication of novel research findings from clinical science, basic and translational research on the entire spectrum of nephrological and urological disorders. The Basic Research Section includes renal cell biology, renal pathology and pathophysiology, genetics of kidney diseases, renal immunology, hemodynamics regulation, electrolytes and acid-base balance, and other mechanisms study of renal disorders. Clinical trials, observational studies, and other original clinical research work related to kidney diseases are the focus of the Clinical Science Section. Important studies on hemodialysis and peritoneal dialysis are also considered. Moreover, the journal welcomes articles addressing interdisciplinary fields, such as hypertension and associated cardiovascular disease, endocrine disorders related kidney injury, renal nutrition and health care policy. Invited review articles and editorials by renowned experts and high-quality rapid communications round off the contents of the journal.

Nephron comprises sections "Clinical Practice", "World Kidney Health", and "Experimental Nephrology and Genetics", which are under the editorship of internationally recognized leaders and specialized associate editors. Apart from high-quality original research, *Nephron* publishes invited reviews/mini-reviews on up-to-date topics. The section "Clinical Practice" also includes Second Opinion articles, which provide a platform for international experts and opinion leaders to cast a critical eye over published papers dealing with hot topics in clinical and experimental nephrology. The section "World Kidney Health" covers issues from global kidney health and pathologies, patient centeredness and patient care, healthcare environment and public health policy. The section "Experimental Nephrology and Genetics" includes case studies of genetic interest and articles that provide clinically relevant examples of the genetic heterogeneity of renal diseases.

Contributions to Nephrology

The speed of developments in nephrology has been fueled by the promise that new findings may improve the care of patients suffering from renal disease. Participating in these rapid advances, this series has released an exceptional number of volumes that explore problems of immediate importance for clinical nephrology. Focus ranges from discussion of innovative treatment strategies to critical evaluations of investigative methodology. The value of regularly consolidating the newest findings and theories is enhanced through the inclusion of extensive bibliographies which make each volume a reference work deserving careful study.

Brain, Behavior and Evolution is a journal with a loyal readership, high standards, and a unique profile as the main outlet for the continuing scientific discourse on nervous system evolution. It publishes comparative neurobiological studies that focus on nervous system structure, function, or development in vertebrates and invertebrates. It also features review articles that provide critical overviews of current topics in evolutionary neurobiology. Approaches range from the molecular over the anatomical and physiological to the behavioral. Most papers published in *Brain, Behavior and Evolution* include an evolutionary angle, at least in the discussion, and focus on neural mechanisms or phenomena. Within this scope, the journal is currently particularly interested in suitable contributions from experimental and behavioral studies. The journal has a loyal following among evolutionary neurobiologists and is of interest to neuroethologists, neuroanatomists, comparative and developmental biologists, and neuroscientists investigating species diversity.

Cerebrovascular Diseases is an international, interdisciplinary, peer-reviewed journal that publishes articles of broad interest to health professionals and researchers of stroke medicine and the study of cerebrovascular disease. The journal has a global perspective and considers articles covering prevention, diagnosis, management, rehabilitation, and related fields of molecular genetics, vascular biology, pathophysiology, epidemiology, and health systems science. The editors encourage submissions of original research, reviews, and commentary articles that focus on knowledge advancement and inform clinical practice and health policy.

Cerebrovascular Diseases Extra is an Open Access sister journal that provides peer-reviewed content to inform clinical practice and policy of stroke medicine and patient care in different world regions. This journal accepts original research papers, reviews, case series of particular interest, commentaries on clinical topics, case-based ethical issues, practice management tips, novel systems of care, and health policy discussions.

The journal offers a platform for exploring cognitive dysfunction through innovative preclinical and clinical investigations. *Dementia and Geriatric Cognitive Disorders* concentrates on Alzheimer's disease and other forms of dementia, as well as neurodegenerative disorders in which cognitive dysfunction is a major aspect of the disease. The journal draws from diverse related research disciplines such as bioinformatics, psychogeriatrics, neuropsychology, clinical neurology, neuroimaging, physiology, genetics, molecular biology, pathology, biochemistry, immunology, pharmacology, and pharmaceuticals. A strong emphasis is placed on the publication of research findings from multi-disciplinary studies that incorporate basic science and pre-clinical aspects with the clinical and therapeutic experience to provide a comprehensive understanding and deep appreciation of the field.

Dementia and Geriatric Cognitive Disorders Extra is an Open Access and online-only sister journal that provides additional peer-reviewed content based on both independent submissions and transferred submissions from *Dementia and Geriatric Cognitive Disorders*.

Developmental Neuroscience is a multidisciplinary journal publishing papers covering all stages of invertebrate, vertebrate, and human brain development. Emphasis is placed on publishing fundamental as well as translational studies that contribute to progress in understanding mechanisms of normal development as well as genetic and environmental causes of abnormal brain development. The journal provides valuable information for both physicians and biologists. Original research reports, reports on technological advances, and long and short reviews are accepted.

Current topics of particular interest to the journal include:

- Genetics of neurodevelopmental disorders
- Stem cell-derived models of neurological disease
- Injury of the developing nervous system
- Pre-clinical models of neurodevelopmental disorders

This is a Subscribe to Open (S2O) journal, aiming to achieve Open Access without cost to authors or readers. Under S2O, if subscriptions are renewed to a certain level, that volume will be made Open Access and articles may be published without Article Processing Charges (APCs).

A Transformative Journal by Karger

Neurodegenerative Diseases is a multidisciplinary journal dedicated to publishing and discussing advances in research on all aspects of neurodegenerative diseases. The journal focuses on Alzheimer disease, Parkinson disease, amyotrophic lateral sclerosis, and Huntington disease, but also welcomes articles on related neurological and psychiatric disorders. It has a particular emphasis on the interplay between vascular pathology, neuroinflammatory change, and the progression of neurodegenerative disease. In addition to clinical and basic science studies, brief methodological papers are welcome in the emerging fields of statistical genetics, clinical and preclinical neuroimaging, novel algorithms of biomedical image computing, and other approaches elucidating mechanisms of neurodegenerative disease. *Neurodegenerative Diseases* accepts high-quality papers in the form of brief reports, research articles, and review articles from a broad spectrum of scientific research areas ranging from neuroscience and genetics to clinical and preclinical neuroimaging and biomarker studies, molecular and cell biology, as well as pharmacology. All articles undergo rigorous scientific as well as statistical/bioinformatic peer review to ensure excellence. The journal provides fast peer review and provides opportunities for Open Access publication.

Pediatric Neurosurgery publishes new information and observations in pediatric neurosurgery, neurology, neuroradiology, and neuropathology. The focus is on the etiology of neurological diseases, the operative care of affected patients, and outcomes research. In addition to experimental and clinical studies, the journal presents critical reviews on selected topics as well as case histories and reports on advances in surgical techniques. This thought-provoking approach encourages the dissemination of information from neurosurgeons and neuroscientists around the world. Published materials are of interest to both researchers and clinicians who study and care for patients with pediatric, congenital, and developmental disease of the nervous system.

This is a Subscribe to Open (S2O) journal, aiming to achieve Open Access without cost to authors or readers. Under S2O, if subscriptions are renewed to a certain level, that volume will be made Open Access and articles may be published without Article Processing Charges (APCs).

Stereotactic and Functional Neurosurgery is the single and comprehensive source of developments in the most rapidly advancing subspecialty within neurosurgery. Technological advances in computer-assisted surgery, robotics, imaging, and neurophysiology are being applied to clinical problems with ever-increasing rapidity in stereotaxis more than any other field, providing opportunities for new approaches to surgical and radiotherapeutic management of diseases of the brain, spinal cord, and spine. The journal publishes advances in the use of deep-brain stimulation, imaging-guided techniques in stereotactic biopsy and craniotomy, stereotactic radiosurgery, and stereotactically implanted and stereotactically guided radiotherapeutics and biologicals in the treatment of functional and movement disorders, brain tumors, and other diseases of the brain. Background information from basic science laboratories related to such clinical advances are also welcome as it provides the readers with an overall perspective of this field. Proceedings and abstracts from many of the key international meetings furnish an overview of this specialty available nowhere else. *Stereotactic and Functional Neurosurgery* meets the information needs of both investigators and clinicians in this rapidly advancing field.

Frontiers of Neurology and Neuroscience

Progress in Neurological Surgery

Published since 1966, this series has become universally recognized as the most significant group of books serving neurological surgeons. Volumes feature contributions from distinguished international physicians and surgeons who review the literature from the perspective of their own personal experience. The result is a series of works providing critical distillations of developments of central importance to the theory and practice of neurological surgery.

A Transformative Journal by Karger

Annals of Nutrition and Metabolism is a leading international peer-reviewed journal for sharing information on human nutrition, metabolism, and related fields, covering the broad and multidisciplinary nature of science in nutrition and metabolism. The journal focuses on human nutrition and metabolism, and related areas, including experimental studies and basic science that can inform human nutrition science. We welcome manuscripts describing observational and intervention studies as well as basic science reports on the topics of foods, diets and dietary supplements, nutrigenomics and genetics related to metabolism, on energy metabolism, macro- and micronutrients including vitamins and minerals, biofunctional compounds, dietetics, obesity, clinical nutrition, social sciences and health economy as related to nutrition and metabolism, and nutrition policy. Laboratory-based science may include descriptions of relevant experimental models. In addition to original papers, the journal will publish review articles on topical subjects, systematic reviews, short commentaries and viewpoint articles that may address current controversies, short meeting reports, letters to the editor, and announcements/society news.

Lifestyle Genomics

Lifestyle-gene interactions and their influence on health and disease

Lifestyle Genomics aims to provide a forum for highlighting new advances in the broad area of lifestyle-gene interactions and their influence on health and disease. The journal welcomes novel contributions that investigate how genetics may influence a person's response to lifestyle factors, such as diet and nutrition, natural health products, physical activity, and sleep, amongst others. Additionally, contributions examining how lifestyle factors influence the expression/abundance of genes, proteins, and metabolites in cell and animal models as well as in humans are also of interest. The journal publishes original research papers, brief research communications, reviews outlining timely advances in the field, and brief research methods pertaining to lifestyle genomics. The section "Marketplace" presents articles of companies active in the area of lifestyle genomics.

Obesity Facts publishes articles covering all aspects of obesity, in particular epidemiology, etiology and pathogenesis, treatment, and the prevention of adiposity. As obesity is related to many disease processes, the journal is also dedicated to all topics pertaining to comorbidity and covers psychological and sociocultural aspects as well as influences of nutrition and exercise on body weight.

Nestlé Nutrition Institute Workshop Series

In 2011, the two book series *Nestlé Nutrition Workshop Series: Pediatric Program* and *Nestlé Nutrition Workshop Series: Clinical & Performance Program* merged to form the *Nestlé Nutrition Institute Workshop Series*. One of the major components of the series is the organization of workshops and the publication of the proceedings. Each workshop focuses on the latest findings, controversies, and further research needs concerning various topics in nutrition. The books of this series will be of great assistance to pediatricians, clinical investigators, sports scientists, as well as health workers and nutritionists concerned with both adult and pediatric health and nutrition.

World Review of Nutrition and Dietetics

Volumes in this series consist of exceptionally thorough reviews on topics selected as either fundamental to improved understanding of human and animal nutrition, useful in resolving present controversies, or relevant to problems of social and preventive medicine that depend for their solution on progress in nutrition. Many of the individual articles have been judged as among the most comprehensive reviews ever published on the given topic. Since the first volume appeared in 1959, the series has earned repeated praise for the quality of its scholarship and the reputation of its authors.

Breast Care is a scientific journal that encompasses all aspects of breast biology. As an interdisciplinary journal, it includes manuscripts describing research, prevention, diagnosis, and treatment of malignant and benign diseases of the breast. In addition to presenting current developments in clinical research, it addresses broader topics in clinical practice by including articles that address legal, financial, and economic issues of importance. *Breast Care* is addressed to clinicians and practitioners working and researching in the field of breast health, breast ailments, and breast cancer.

Case Reports in Oncology is a peer-reviewed, Open Access journal that publishes original case studies covering the entire spectrum of oncology, including prevention, diagnosis, treatment, toxicities of therapy, supportive care, quality-of-life, and survivorship issues. The journal will also accept case reports dealing with the use of novel technologies, both in the area of diagnosis and treatment. In this forum, clinicians and researchers can communicate their findings to a broader oncology community.

Chemotherapy publishes original research articles and state-of-the-art reviews on all aspects of antimicrobial and antitumor chemotherapy. The results of experimental and clinical investigations into the microbiological and pharmacological properties of antibacterial, antiviral, and antitumor compounds are major topics of publication. Papers selected for the journal offer data concerning the efficacy, toxicology, and interactions of new drugs in single or combined applications. Studies designed to determine the pharmacokinetic and pharmacodynamic properties of similar preparations and comparing their efficacy are also included. Special emphasis is given to the development of drug resistance, an increasing problem worldwide.

This journal works to accelerate the translation of experimental results into the clinic and back again into the laboratory for further investigation. The fundamental purpose of this effort is to advance clinically relevant knowledge of cancer and improve the outcome of prevention, diagnosis, and treatment of malignant disease. The journal publishes significant clinical studies from cancer programs around the world, along with important translational laboratory findings, mini-reviews (invited and submitted), and in-depth discussions of evolving and controversial topics in the oncology arena. A unique feature of the journal is a section which focuses on rapid peer review and subsequent publication of short reports of phase 1 and phase 2 clinical cancer trials, with the goal of ensuring that high-quality clinical cancer research quickly enters the public domain, regardless of the trial's ultimate conclusions regarding efficacy or toxicity.

Ophthalmic Research features original research and reviews reporting on translational and clinical studies in the field of ophthalmology and vision research. The journal emphasizes hypothesis-based clinical and laboratory research with statistically valid results that clearly advance the fields of ophthalmic and vision research. It also provides a record of international clinical research for both researchers and clinicians in ophthalmology. The transfer of information from fundamental research to clinical research and clinical practice is particularly welcome. The journal is affiliated with the European Vision Institute Clinical Research Network, European Vision Institute, European School for Advanced Studies in Ophthalmology, and the World Society of Paediatric Ophthalmology and Strabismus.

Established since 1899, *Ophthalmologica* is a frequently cited guide to research in clinical and experimental ophthalmology with a large international circulation and international readership. It contains a selection of patient-oriented contributions covering the etiology of eye diseases, diagnostic techniques, and advances in medical and surgical treatment, with special emphasis on retinal diseases. In addition to original research, the journal regularly features timely reviews to help readers stay up to date. *Ophthalmologica* is the official journal of the European Society of Retina Specialists (EURETINA).

Developments in Ophthalmology

The book series *Developments in Ophthalmology* provides ophthalmologists, ophthalmic surgeons, and practicing optometrists with expert reviews highlighting the most important developments in their field. Innovative procedures from a wide range of areas – such as corneal or macular disorders, pharmacological issues, OCT, and many more – are presented with the appropriate technical information required to encourage rapid introduction into clinical practice. For each volume expert authors producing articles of only the highest standards are invited to present their knowledge. During the considerable history of its existence *Developments in Ophthalmology* has established itself as an essential reference in the field of ophthalmology.

With articles offering an excellent balance between clinical cytology and cytopathology, *Acta Cytologica* fosters the understanding of the pathogenetic mechanisms behind cytomorphology and thus facilitates the translation of front-line research into clinical practice. As the official journal of the International Academy of Cytology and affiliated to over 50 national cytology societies around the world, *Acta Cytologica* evaluates new and existing diagnostic applications of scientific advances as well as their clinical correlations. Original papers, review articles, meta-analyses, novel insights from clinical practice, and letters to the editor cover topics from diagnostic cytopathology, gynecologic and nongynecologic cytopathology, to fine-needle aspiration, molecular techniques, and their diagnostic applications. As the perfect reference for practical use, *Acta Cytologica* addresses a multidisciplinary audience practicing clinical cytopathology, cell biology, oncology, interventional radiology, otorhinolaryngology, gastroenterology, urology, pulmonology, and preventive medicine.

Pathobiology offers a valuable platform for the publication of high-quality original research into the mechanisms underlying human disease. Aiming to serve as a bridge between basic biomedical research and clinical medicine, the journal welcomes articles from scientific areas such as pathology, oncology, microbiology, cell and molecular biology, and immunology.

Monographs in Clinical Cytology

Monographs in this series have given the field of cytology an outstanding set of reference works. Volumes perform the important function of correlating extensive basic and clinical findings and applying these to discuss how innovations in cytology can improve patient diagnosis and management. Readers will find descriptions of techniques offering greater simplicity, speed, patient comfort and cost effectiveness as well as improved diagnostic precision. The immense utility of these texts has resulted in the release of updated second editions of earlier volumes, which continue to meet the popular demand for access to this material.

Medical Cannabis and Cannabinoids is a peer-reviewed journal offering an international forum to present and discuss recent advances in the rapidly developing and challenging field of the medical use of cannabis and cannabinoids. It seeks to bridge the gap between empirical and evidence-based clinical medicine by covering current basic and applied as well as translational research topics. In addition to Research Articles and Review, this journal features Registered Reports, Protocols, Brief Reports, and Case Reports.

Pharmacology

Pharmacology is an international journal committed to sharing the latest findings, news, and concepts pertaining to drug discovery, development, and therapy. Original scientific research presented in this journal stretches from basic to clinical studies, mirroring the scope which spans from bench-to-bedside research to modern reverse translational studies and precision medicine approaches. The journal primarily publishes research articles, reviews, and commentaries to encourage knowledge transfer and discussion among the audience with an interest in experimental and clinical pharmacology, toxicology, pharmaceutical medicine, and biomedical sciences.

Respiration brings together the results of both clinical and experimental investigations on all aspects of the respiratory system in health and disease. Clinical improvements in the diagnosis and treatment of chest and lung diseases are covered, as are the latest findings in physiology, biochemistry, pathology, immunology, and pharmacology.

Progress in Respiratory Research

Important aspects of the respiratory system, from its role in the alimentation and protection of the organism to its susceptibility to disease, receive attention in the volumes published in this series. Some volumes present debates on topics vital to respiratory research. Others represent the unique experiences of a single renowned author and stand as first-time treatments of specific issues. "The blue series" is designed for researchers as well as clinicians and extends to them a collection of valuable reference tools.

Complex Psychiatry is a peer-reviewed, rapid communication journal that focuses on the complexity of psychiatry and human behavior considering a wide range of methods – including genomics, epigenomics, transcriptomics, proteomics, metabolomics, pharmacogenomics, bioinformatics, molecular neuropharmacology, neural circuits, neural stem cells, and systems neurobiology in humans and in animal and cellular model systems. The journal publishes original research articles and reviews that shed light onto the biology of psychiatric illness and complex behavioral traits. Submitted papers will be subject to an editorial review, and a decision whether further peer review will be made in approximately 5 business days. We aim to have an initial review decision within 1 month. Simultaneous *bioRxiv* submission is strongly encouraged.

A Transformative Journal by Karger

European Addiction Research is a unique international scientific journal for the rapid publication of innovative research covering all aspects of addiction and related disorders. Representing an interdisciplinary forum for the exchange of recent data and expert opinion, it reflects the importance of a comprehensive approach to resolve the problems of substance abuse and addiction in Europe. Coverage ranges from clinical and research advances in the fields of psychiatry, biology, pharmacology, and epidemiology to social and legal implications of policy decisions. The goal is to facilitate open discussion among those interested in the scientific and clinical aspects of prevention, diagnosis, and therapy as well as dealing with legal issues.

Distinguished by its international recognition since 1958, *Human Development* publishes theoretical and metatheoretical contributions to the study of psychological development, including conceptually, historically, and methodologically oriented integrative reviews of lines of developmental research. Contributions serve to raise theoretical issues, flesh out interesting and potentially powerful ideas, and conceptually differentiate key constructs within developmental science. Contributions come primarily from developmental psychology but are welcome from other relevant disciplines. Descriptions of empirical evidence to support theoretical arguments or help integrate issues of theory, methods, and evidence (especially across disciplines) are also welcome but only insofar as they are employed for strictly illustrative purposes in the service of a conceptual contribution to the field.

Neuropsychobiology

The translational approach to behavior and mental disorders

More information:

karger.com/nps

The biological approach to mental disorders continues to yield innovative findings of clinical importance, particularly if methodologies are combined. This journal collects high-quality empirical studies from various experimental and clinical approaches in the fields of biological psychiatry, biological psychology, and neuropsychology. It features original, clinical, and basic research in the fields of neurophysiology and functional imaging, neuropharmacology and neurochemistry, neuroendocrinology and neuroimmunology, genetics, and their relationships with normal psychology and psychopathology. In addition, coverage includes studies on animal models of mental disorders and therapeutic interventions, and pharmacoelectroencephalographic studies, as well as reviews on new methodological approaches. *Neuropsychobiology* is thus a comprehensive record of strategies and methodologies employed to study the biological basis of mental functions, including their interactions with psychological and social factors.

karger.com/psp

Psychopathology is a record of research centered on findings, concepts, and diagnostic categories of phenomenological, experimental, and clinical psychopathology. Studies published are designed to improve and deepen the knowledge and understanding of the pathogenesis and nature of psychopathological symptoms and psychological dysfunctions. Furthermore, the validity of concepts applied in the neurosciences of mental functions is evaluated in order to closely bring together mind and brain. Major topics of the journal are trajectories between biological processes and psychological dysfunction that can help us better understand a subject's inner experiences and interpersonal behavior. Phenomenological and experimental psychopathology, neuropsychology, and neuroscience as well as developmental psychopathology and youth mental health contribute to this field.

Published since 1953, *Psychotherapy and Psychosomatics* has progressively increased its reputation for independence, originality, and methodological rigor. It has anticipated and developed new lines of research concerned with psychosomatic medicine, psychotherapy research, and psychopharmacology. Ranking among the world's most cited journals in the field now, *Psychotherapy and Psychosomatics* provides a unique forum for current and controversial issues and innovations in assessment and treatment. As the official journal of the International College of Psychosomatic Medicine and the International Federation for Psychotherapy, it is the home of cutting-edge thinking at the interface between medical and behavioral sciences, addressed to both practicing clinicians and researchers.

Die Zeitschrift *Verhaltenstherapie* bildet das breite Spektrum verhaltenstherapeutischer Verfahren ab und ist im deutschen Sprachraum das führende Publikationsorgan ihres Fachgebiets. In Übersichts- und Originalarbeiten sowie Falldarstellungen werden aktuelle Entwicklungen evidenzbasierter psychologischer Behandlungsmethoden aus der Verhaltenstherapie vorgestellt. Diese Auswahl aus Theorie und Praxis wird abgerundet durch Konzeptartikel, Interviews, Kongressberichte und Mitteilungen wissenschaftlicher Fachverbände. *Verhaltenstherapie* ist das offizielle Organ von 21 Ausbildungsinstituten, Gesellschaften und Verbänden in Deutschland, Österreich und der Schweiz und richtet sich an wissenschaftlich und therapeutisch tätige Fachpersonen. Der Service «Deutsch schreiben – Englisch publizieren» bietet die Möglichkeit, Artikel einem internationalen Fachpublikum frei zugänglich zu machen.

Modern Trends in Psychiatry

This series has charted some of the main developments of contemporary psychiatry. Throughout these years, volumes in this series and its associated series have outlined specific problems and controversies that have characterized the growth of psychiatry. Recent volumes have been notable for their bench to bedside coverage of current topics in psychiatry, psychology, and neurosciences. *Modern Trends in Psychiatry* takes a rigorously interdisciplinary as well as translational approach to build bridges to related disciplines. It sets out to disclose and integrate the complex aspects relevant to the successful diagnosis and treatment of psychiatric disorders.

Public Health Genomics aims to bring principles of population science to bear on the translation of genomic discovery for public health benefit globally. The three key functions of public health — Assessment, Policy Development, and Assurance — along with the cross-cutting theme of health equity provide the framework for reviewing the appropriateness of submissions. To that end, the journal welcomes original research, notes from the field, reviews and commentaries within the following public health genomics research domains:

Surveillance Research, Behavioral Research, Communication Research, Community Engagement Research, ELSI Research, and Implementation Science Research.

The *Saudi Journal of Health Systems Research* is a peer-reviewed, Open Access online journal dedicated to healthcare management. It is the official publication of the Kingdom of Saudi Arabia's Ministry of Health and the Ministry's voice to the global scientific community. The journal fosters an environment of research excellence to elevate scientific research in the Kingdom of Saudi Arabia. This journal welcomes papers that cover research, trends, and techniques in health systems and includes articles on hospital and healthcare management and policies, health economics, and digital health. In addition, papers covering multidisciplinary topics with an impact on the health sector are welcome. Manuscripts on these topics can be submitted in the form of original research articles, case studies and reports, review articles, systematic reviews, discussions, guidelines, and brief reports. In this forum, clinicians and researchers can communicate their findings to a broader scientific community and contribute to the development of public health and well-being.

European Surgical Research is a peer-reviewed journal dedicated to preclinical, clinical, clinical experimental, and translational research in surgery. It features surgery, surgical pathophysiology, evidence-based medicine, and novel surgical techniques. Special consideration is given to papers covering the use of animal models, physiological methods, technical innovations (such as robotics, virtual reality, and image-guided surgery), as well as biophysical measuring and recording systems. *European Surgical Research* accepts papers concerning all surgical specialties with a focus on gastrointestinal, hepatobiliary, and pancreatic, vascular, and oncological surgery. The journal is a valuable resource for all interested in pathophysiological concepts and new techniques, for those interested in introducing these concepts and techniques into clinical practice, and for those evaluating critical decisions in the use of new procedures or drugs.

The first journal to focus on the fetus as a patient, *Fetal Diagnosis and Therapy* provides a wide range of biomedical specialists with a single source of reports encompassing the common discipline of fetal medicine. The journal includes peer-reviewed original research papers, spanning from basic and pathophysiological investigations to clinical studies in fetal diagnosis and therapy. In addition, the journal addresses timely topics of wide interest in a section dedicated to reviews and mini-reviews, where specific clinical questions are covered by internationally renowned experts. Finally, two sections, "Novel Insights in Fetal Medicine" and "Images in Fetal Medicine," are dedicated to particularly interesting case reports with a special focus on cases documented by means of multimodal imaging.

A Transformative Journal by Karger

This journal covers the most active and promising areas of current research in gynecology and obstetrics. Invited, well-referenced reviews by noted experts keep readers in touch with the general framework and direction of international study. Original papers report selected experimental and clinical investigations in all fields related to gynecology, obstetrics, and reproduction. Short communications are published to allow immediate discussion of new data. The international and interdisciplinary character of this journal provides an avenue to less accessible sources and to worldwide research for investigators and practitioners.

More information:

karger.com/neo

This highly respected and frequently cited journal is a prime source of information in the area of fetal and neonatal research. Original papers present research on all aspects of neonatology, fetal medicine, and developmental biology. These papers encompass both basic science and clinical research, including randomized trials, novel observational studies, and epidemiology. Basic science research covers molecular biology, molecular genetics, physiology, biochemistry, and pharmacology in fetal and neonatal life. In addition to the classic features the journal accepts papers for sections entitled "Research Briefings," "Sources of Neonatal Medicine" (historical pieces), and "Global Neonatal Research." Papers reporting the results of animal studies should be based upon hypotheses that relate to developmental processes or disorders in the human fetus or neonate.

Pediatric and Adolescent Medicine

This series deals with rapidly evolving pediatric subspecialties such as perinatal medicine, pediatric endocrinology, immunology, neurology, and cardiology. The individual volumes not only highlight recent advances in a particular area, but also provide a comprehensive overview of new trends in monitoring child development and subsequent adult health. The series aims to inform both the general practitioner and the hospital physician about current theoretical and practical developments in pediatric and adolescent medicine.

Complementary Medicine Research is an international peer-reviewed journal. We aim to bridge the gap between conventional and complementary/alternative medicine (CAM) on a sound scientific basis, promoting their mutual integration. Experts of both conventional medicine and CAM medicine cooperate on the journal's editorial board, ensuring a high standard of scientific quality. The journal publishes papers relevant to complementary patient-centered care, especially those with emphases on novel, creative and clinically relevant approaches. It covers the entire spectrum of original research, clinical trials, views, conceptual papers, and reviews on complementary practice and methods, as well as clinical case studies of high quality and relevance.

karger.com/dib

Digital biomarkers are defined as objective, quantifiable physiological and behavioral data that are collected and measured by means of digital devices such as portables, wearables, implantables, or ingestibles. The data collected are typically used to explain, influence, and/or predict health-related outcomes. Digital biomarkers also represent an opportunity to capture clinically meaningful, objective data. Multidisciplinary by design, this innovative Open Access journal bridges the disciplines of computer science, engineering, biomedicine, regulatory science, and informatics. The editorial board includes leaders from academia, life sciences, technology, and government, thus reflecting the broad scope of the journal. Papers are published within 60 days of submission, and the inclusion of videos or other visual materials is supported. Moreover, *Digital Biomarkers* provides and supports access to data, algorithms, and app repositories linked to the articles published in the journal.

Microbial Physiology

Reflecting the integration of basic and applied microbiology

FACTS & FIGURES

Editors-in-Chief: **Ralf Rabus** (Oldenburg);
Milton H. Saier Jr. (La Jolla, CA)

Category: Basic Research
Fields of Interest: Biotechnology,
Microbiology
2024: Volume 34

We are entering a new and exciting era of microbiological study and application. Recent advances in the now established disciplines of genomics, proteomics, and bioinformatics, together with extensive cooperation between academic and industrial concerns, have brought about an integration of basic and applied microbiology as never before. *Microbial Physiology* aims to reflect this development by publishing original research papers from all areas of microbiology and biotechnology. It also features written symposia on selected topics, timely reviews, and mini-reviews. Theoretical approaches and descriptions of novel, microbiologically relevant software are also considered. Contributions and ideas from large segments of the scientific community are welcome to make *Microbial Physiology* a viable, much needed, and up-and-coming forum for current basic and applied microbiological research.

Urologia Internationalis

An independent international forum for clinically oriented research

Official Journal of

Deutsche
Gesellschaft für
Urologie

FACTS & FIGURES

Editors-in-Chief:

Maximilian Burger (Regensburg);

Citation Index Expanded, SCOPUS

ISSN 0042-1138

e-ISSN 1423-0399

More information:

karger.com/uin

Concise but fully substantiated international reports of clinically oriented research into the science and current management of urogenital disorders form the nucleus of original as well as basic research papers. These are supplemented by up-to-date reviews by international experts on the state-of-the-art of key topics of clinical urological practice. Essential topics receiving regular coverage include the introduction of new techniques and instrumentation as well as the evaluation of new functional tests and diagnostic methods. Special attention is given to advances in new surgical techniques and clinical oncology. The regular publication of selected case reports represents the great variation in urological disease and illustrates treatment solutions in singular cases.

Translational Research in Biomedicine

Translational Research in Biomedicine is a book series dedicated to the spread of seminal information in contemporary biomedicine with a translational orientation. It takes a holistic view on translational research that transcends the boundaries between bench and bedside research. Each volume, edited by experts in the field, is a synthesis of ideas, technologies, and research outcomes that are associated with a particular theme in contemporary biomedicine. All volumes will be presented in a fashion that is amenable to non-experts, be they scientists or clinical practitioners.

Karger's eJournal Collections

**Basic and clinical research topics
across the entire medical and health-sciences spectrum**

Karger's eJournal Collection 2024

Backed by a 132-year tradition of medical publishing, the Karger journal program comprises 57 subscription journals, covering all disciplines of human medicine in clinical and research areas.

- Access to all online Karger journals – special arrangements possible for consortia
- Customized collections according to the needs of your library
- Combined collections of eJournals and eBooks upon request

Please contact us for a customized offer!
karger.com/pages/e-journal-collection

Karger's eJournal Backfile Collection

76 eJournal titles from 1998 to 2021 covering substantial progress in disciplines of human medicine in clinical and research areas over the past decades.

- Purchase the complete Karger eJournal Backfile Collection for CHF 38,000 / EUR 38,000 / USD 41,000
- Benefit from attractive flat rates for backfiles of individual titles

Customize your Backfile Collection.
Please ask us for a quote!
karger.com/pages/e-journal-backfile-collection

YOUR BENEFITS:

- DRM-free content
- COUNTER-compliant statistics
- KBART records for eJournals
- Free online trials available!
- Easy access via IP address or user ID and password
- Unlimited simultaneous access

More information:

Karger's eBook Archive Collections

Karger's complete eBook Archive Collection with books from 1996 back to 1890 comprises three individual collections, which can be purchased singly or in combination, and encompasses over 2,400 titles, including nearly 700 out-of-print titles, as well as numerous books not previously available in electronic format

Complete your existing holdings and provide patrons with access to all Karger medical classics, past and present, with Karger's eBook Archive Collection.

Karger's eBook Archive Collection (Series)

The Karger eBook Archive Collection includes long-standing book series like Key Issues in Mental Health (166 titles since 1917, of which around 100 titles are out of print now), Chemical Immunology and Allergy (since 1939), Current Problems in Dermatology (since 1959), or Progress in Respiratory Research (since 1963).

Series Collection*: 1,279 titles

Collection Price:

CHF 25,000 / EUR 25,000 / USD 25,500

Karger's eBook Archive Collection (Non-Series)

Important non-series titles in the eBook Archive Collection are, for example, the proceedings of the First International Congress on Allergy (1952) or Walter Pagel's Paracelsus (1982), a reference title still very much in demand. More than 100 titles are no longer available as print books.

Non-Series Collection*: 549 titles

Collection Price:

CHF 12,000 / EUR 12,000 / USD 12,400

YOUR BENEFITS:

- DRM-free content
- Easy access via IP address or User ID and password
- Unlimited simultaneous access
- COUNTER-compliant statistics on request
- MARC 21 and KBART records available

More information:

karger.com/pages/online-collections

All prices excl. VAT and local sales tax. EUR prices for eurozone countries, USD prices for USA and Latin America only. Contact us at collection@karger.com for a customized quote according to your specific needs!

Karger's eBook Archive Collection (German)

The Karger eBook Archive Collection includes 626 titles in German, going back to the first Karger book published in 1890, the *Geburtshülfliches Vademecum*. Around 240 titles of this collection are no longer available in print.

Non-Series Collection German: 626 titles

Collection Price:

CHF 10,000 / EUR 10,000 / USD 10,500

* To ensure both Series and Non-Series Archive Collections are complete some complementary foreign language titles are included. Please find a detailed list of titles of the "Karger eBook Archive Collection" in the section eBook Collections Information Download.

Karger's Subject Packages

Karger offers customized packages focusing on single research or medical subjects. Karger's Subject Packages – comprising eJournals and/or eBooks – provide highly selected content to meet the increasing demand for specific information of researchers, specialists, and practitioners in hospitals, research centers, the pharmaceutical industry, and other professional institutions.

For more details, see karger.com/collections/topic-article-package and for your enquiries please contact us at collection@karger.com.

Order Information

BOOKS

Book orders can be placed at any bookstore, directly with Karger Publishers or with one of our representatives. Please indicate the ISBN number of any title you wish to order. The e-ISBN refers to the electronic version of a title. Deliveries are made from Karger headquarters in Basel, Switzerland. All Karger book titles, with a few exceptions, are available in print and online (eBooks); for availability and prices, please see the title's homepage atkarger.com or contact us at orders@karger.com.

eBooks

When ordering a book with an online component, the customer is required to complete a site license (see karger.com/pages/terms-and-conditions). For repeat online customers, there is an appropriate field in the order form. Booksellers should submit a site license completed by the end user together with the order. Private customers can also order Karger eBooks via Google and Amazon.

Continuation Orders for Book Series

Continuation orders can be placed for print and online formats. Such orders bring the benefit of automatic continuity under the order number.

eCOLLECTIONS AND PACKAGES

Karger offers a variety of subject packages and collections.

Subject Packages

For details about the available subject packages please see:
karger.com/collections/topic-article-package

JOURNALS

Journal subscriptions can be placed at any bookstore, subscription agency, directly with Karger Publishers, or with one of our representatives.

The complete order information can be found on our website at:
karger.com/pages/terms-and-conditions

Subscriptions

Karger offers three types of subscription: print, online, and combined print/online. The basic annual subscription rate is the same for all three delivery forms; however, there are additional fees for print and combined print/online.

Subscription Rate Model

Print:	100% + postage and handling
Online:	100%
Com. print/online:	100% + upgrade fee + postage and handling

For personal subscription prices, please consult our website at karger.com/journals. For online and combined print/online subscriptions, please also consult karger.com/pages/terms-and-conditions. All subscriptions are payable in advance.

Subscription Period

Print subscriptions run for a full calendar year and may cover more than one volume. New subscriptions placed during the year will begin with the delivery of back issues for that subscription year. An online subscription allows access only to issues published in the subscription year.

For questions and problems contact us at service@karger.com.

Authorized Access

Access is regulated via IP address(es) and/or user ID/password. Karger supports both Shibboleth and OpenAthens.

Back Volumes and Single Issues

Information on availability and prices of single print issues, print back volumes, or electronic backfiles can be obtained at service@karger.com.

For complete order information, please refer to our website at:
karger.com/pages/catalogue-and-pricing

Prices, Ordering, and Contact

Unless otherwise stated, the online price applies to institutional purchases; the online price for private customers is the same as the hard cover or soft cover (print) price. All prices are based on the Swiss Franc (CHF) and subject to change. Prices in EUR are valid for eurozone countries only, prices in USD are valid for the USA and Latin America only. Prices quoted do not include delivery charges and are excluding VAT and local sales tax. Where applicable, VAT is applied at the appropriate rate and shown separately in the final invoice. Contact details of the Karger offices and distributors can be found at karger.com/contact.

Every book and journal homepage offers an online order form. Orders can also be e-mailed to orders@karger.com.

Please note that due to bank regulations Karger Publishers accepts checks only for payments above the amount of CHF/EUR/USD 5,000. If you have any questions, please do not hesitate to contact our Customer Service at orders@karger.com.

Information Service

The Karger Alert system informs you about all new article, journal, or book releases in your field of interest. Login at karger.com, set up your MyKarger account, and sign up for customized alerts and newsletters.

Comprehensive book and journal information downloads are available at karger.com/downloads.
